Summary

- Frontend-focused Software Engineer with hands-on experience building responsive, scalable web interfaces using **React.js**, **Next.js**, and modern JavaScript (ES6+).
- Skilled in developing reusable component architectures, managing state with Hooks and Context API, and implementing clean, maintainable UI codebases.
- Experienced in translating UI/UX designs into functional, performant components with strong attention to detail, accessibility, and cross-device responsiveness.
- Proficient in frontend performance optimization, SSR/CSR workflows with Next.js, API-driven UI development, and building secure, user-friendly interfaces.

Education

Parul University, Vadodara

2023 – 2025

MCA in Cloud Computing, CGPA: 8.68 / 10

Skills

Frontend: React.js, Next.js (SSR/CSR), TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Design

Backend & APIs: Node.js, Express.js, RESTful API Design, API Integration

Architecture Concepts: Component-Based Design, State Management, Authentication, Role-Based Access Control (RBAC), Real-Time Systems

DevOps & CI/CD: Git, GitHub Actions (CI pipelines), Build & Deployment Automation

Databases: MongoDB, MySQL, SQL

Experience

AccioJob Pvt Ltd | Web Development Trainee

Oct 2024 – April 2025

- Completed 6-month intensive training program focused on web development.
- Gained practical exposure to frontend (**HTML, CSS, JavaScript, React.js**) and backend development.

SoftSource Technolabs | Frontend Developer

June 2025 – Present

- Contributed to production-grade web applications using **React.js** and **Next.js**, progressing from internship to frontend developer role.
- Built scalable, reusable UI components and implemented server-side rendering (SSR) and routing using Next.js to improve performance and SEO.
- Collaborated with backend engineers to define API contracts and integrate **RESTful services**, ensuring reliable and maintainable system architecture.
- Implemented authentication flows and role-based access control (RBAC) within full-stack MERN applications.
- Worked closely with designers and product stakeholders to translate business requirements into responsive, user-focused interfaces.

Projects

MotorQuote | Next.js, MERN, Role-Based Access System

- Contributed to the development of a dealership management and quotation platform built using **Next.js** and the MERN stack.
- Implemented role-based access control to manage super admin, primary admin, and dealership-level permissions.
- Designed and integrated REST APIs for quotation workflows, dealership assignments, and admin-level operations.
- Collaborated with backend engineers to ensure scalable system architecture and secure data handling.

Notesio | MERN, REST API, WebSocket, PDF

- Developed a full-stack note-taking application using the **MERN stack**.
- Implemented **CRUD operations** with RESTful API integration.
- Integrated **WebSocket** for real-time updates and collaboration.
- Added functionality to download notes as **PDF**.

Khana Khazana | MERN, Authentication, Blog System

- Built a food-related MERN application with user **authentication** and role-based access.
- Implemented **CRUD operations** for recipes, blogs, and user content.
- Designed responsive UI for users to explore, create, and manage food blogs.

Go-Chat | React.js, Firebase, Real-time Messaging

- Developed a full-stack chat application with **React.js** and **Firebase**.
- Implemented **real-time messaging**, authentication, and cloud storage features.
- Enabled one-to-one and group chat functionality with live user presence.
